

## Sustainability, Innovation and Change Management Corporate Affiliates Workshops

Sustainability, innovation and change management matters for every corporation in America that looks toward the future. [The AHC Group](#) (AHC) and [C2E2 Strategies, LLC](#) (C2E2) have decades of experience advising leading companies on gaining competitive advantage through managing change amidst rapidly evolving energy and environmental developments. We hold an annual workshop series to facilitate knowledge exchange and collegial networking for our Corporate Affiliate members. For more than two decades, these workshops have brought together leading corporations, including numerous Fortune 500 companies, for lively and engaging discussions. Corporate Affiliate membership includes the following:

- **Invitation to two in-person Corporate Affiliates Workshop events** (in June in New York City and in January in Washington, D.C. or Phoenix, Arizona). Each workshop provides 1.5 days of curated discussions on key topics, while maximizing networking in a collegial, peer-to-peer forum of 40-55 corporate leaders and select invitees.
- **Member dinner at the end of the first day of each workshop** for the main corporate representative from each Corporate Affiliate.
- **Group calls with members are scheduled monthly in the six months prior to a workshop to develop the agenda for the workshop and confirm speakers.** AHC and/or C2E2 are also available to meet with Corporate Affiliates in the fall in New York City during Climate Week.

In addition to the main representative from each Corporate Affiliates member, membership allows a member to bring two additional corporate invitees to the workshops free of charge. Members can also identify three representatives from other companies (e.g., Fortune 500 companies), who members would like to see join a workshop, to attend free of charge as their guest or requested invitee. The Corporate Affiliate membership rate is \$15,000 per company, which includes two in-person workshops and the above benefits. Member discounts of 10% are available for separately arranged consulting services by AHC or C2E2. These services include additional deep-dive discussions, training on specific topics at corporate sites (including for up-and-coming leaders at member organizations), and additional bespoke consulting. AHC and C2E2 also can establish Sustainability Advisory Councils, working with clients to assemble rosters of experts to support change management and realignment of corporate strategies, and enhance corporate governance, on key issues related to sustainability, GHG management and carbon finance, next generation energy, climate adaptation and resilience, and corporate innovation more broadly.

Leading not-for-profit organizations that engage with corporations on shared missions of sustainability and innovation may become Affiliate Members for \$7,500 annually.

To join as a Corporate Affiliate member, contact Chris Carr at [ccarr@c2-e2.com](mailto:ccarr@c2-e2.com). For additional inquiries and to request a review copy of his recent book "Wealth and Climate Competitiveness," write AHC Group founder Bruce Piasecki at [Bruce@ahcgroup.com](mailto:Bruce@ahcgroup.com).
